## **Cursive Handwriting Instruction Guide**

Manipulative- School Rite

Is a plastic template for the alphabet in cursive. A practical and useful learning tool designed to teach writing skills to the beginning learner. The template is a thick, heavy-duty quality piece with one-inch letters. The template guides the pencil through the letter configuration, giving practice in writing each letter. The stroke movement that children feel is what is emphasized in this activity. The template is designed to make the pencil lift where normal lift occurs in the handwriting sequence. When the stroke sequence is finished, your child removes the template and re-writes the letter, connecting the lines. This reinforces the correct writing of the letter and develops your child's fine motor skills. The one-inch letters are on an 8 1/2" x 11" template.

Students who have difficulty with cursive writing will find the alternative approach of this lesson unit especially helpful. By eliminating some of the loops found on capital letters, the activities here provide the simplification necessary to promote good handwriting. These extra loops are not necessary to letter recognition, they are simply pleasing to the eye. To further assist students, the practice exercises featured here are highly sequential. For example, students are not expected to write words containing letters they have not first practiced individually.
